STALK

THE NEXT LEVEL OF TECHNOLOGY

ABOUT THE COMPANY

Our company was founded in 2019. We create products that are comfortable for work and leisure. Most of the products are patented by us. This means that we produce unique models that have no analogues in the world.

Company CEO
Igor Viacheslavovich
Gorbarchuk

We use state-of-the-art high-precision equipment and employ experienced specialists. We constantly follow new trends, think ahead and create useful and original solutions for life.

Deputy CEO
Sergei Vasilevich Orlov

PRODUCT RANGE

1. STALK multifunctional potato digger;
2. STALK manual cultivator;
3. STALK manual drill with ratchet mechanism and folding handle 100mm/180mm;
4. Cyclone manual cultivator;
5. STALK reinforced U-shaped shovel;
6. STALK reinforced tiling shovel;
7. STALK digging fork 5 cogs;
8. STALK narrow digging fork 4 cogs;
9. 4-in-1 set (hoe, ripper, rake, ridging plow);
10. STALK folding grill (steel/stainless steel)

STALK MULTIFUNCTIONAL POTATO DIGGER

The latest invention for digging out potatoes and other root vegetables, as well as loosening and digging the soil. It allows you to treat the soil in a nonmouldboard way, that is, without turning it over. Therefore, the upper fertile and lower non-fertile layers of the ground do not mix, allowing moisture and microelements to be preserved in the soil. And, all weed roots are extracted to the surface by tool knives. The potato digger allows you to relief the load from your back, as there is no need to bend or squat. Reliable and very convenient, easy to operate.

STALK MANUAL CULTIVATOR

Lightweight, convenient to use and effective tool. The cultivator is designed in such a way that it loosens only the fertile layer of soil, in a nonmouldboard way.

The unique patented design of the cultivator allows you to loosen the piece of land you need without any load on your back. You can use the cultivator on any soil, even with small stones and gravel. STALK cultivator-ripper is easy to use. It is accessible for seniors, women and even children.

STALK MANUAL DRILL

STALK manual drill is a unique proprietary tool for drilling holes in the ground. The uniqueness of the drill is its handle which has a ratchet mechanism that allows to drill without doing a full round of the handle. And one of the drill handles has a hinged mechanism and can be moved from horizontal to vertical position and fixed in both positions. Thus, we move the drill handle to a vertical position, put the drill closely against the wall and drill, moving the handle back and forth with the help of a ratchet. It has detachable augers for 100 mm and 180 mm.

CYCLONE MANUAL CULTIVATOR

This patented model allows you to work at any land lot without too much load on your back. It is designed for areas where soil needs to be processed selectively, but it also shows good results on solid areas. The shape of clogs made of durable sheet metal makes it easy to loose the ground.

STALK REINFORCED U-SHAPED SHOVEL

Reinforced U-shaped shovel (rail steel). The shank is made of metal pipe with a plastic handle. The shovel is resistant to high loads, having a relatively small weight.

STALK REINFORCED TILING SHOVEL

Reinforced tiling shovel (rail steel). The shank is made of metal pipe with a plastic handle. The shovel is resistant to high loads, having a relatively small weight.

STALK DIGGING FORK 5 COGS

Digging fork with 5 cogs (25 cm width) is designed for digging heavy and difficult soils, digging out root vegetables. The shank is made of strong, lightweight steel pipe with plastic handle on the end, the cogs are made of durable metal, in a shape of flat knives pointed and curved at the end which are resistant to loads and experience less soil resistance, allowing soil to be excavated with less effort.

STALK DIGGING FORK (NARROW) 4 COGS

Digging fork with 4 cogs (narrow, 15 cm width) are designed for digging heavy and complex soils in narrow places (interrows, etc.). The shank is made of strong, yet lightweight steel pipe with a plastic handle on the end. The cogs are made of metal, in the shape of flat knives, pointed and curved at the end, which are resistant to loads and experience less soil resistance, allowing soil to be excavated with less effort.

STALK 4-IN-1 SET (HOE, RIPPER, RAKE, RIDGING PLOW)

4-in-1 is a universal set. Detachable shunk made of light metal tube with removable pieces - hoe, rake, ridging plow, ripper with 7 cogs in cat claw shape. Good for transportation. Easy to work on any soils thanks to the selection of detachable pieces.

STALK FOLDING GRILL (steel)

Steel folding grill has a unique patented shape. The bottom is made of a solid iron sheet, it has two sloping faces and welded sidewalls. Folding shelves on the sides have two reinforcement ribs, which hold the grill shape at high temperatures and fight any deformation. The grill is very easy to fold and unfold, you just need to pull the legs from the bottom to the sides, lift the folding sides and install the side shelves. When folded, the grill is very compact 50 cm by 30 cm and is only 8 cm high. The grill is provided with a comfortable and durable bag, which allows you to transport and carry the grill without any inconvenience. This durable and reliable grill will serve you many years making open air cooking comfortable and enjoyable.

STALK FOLDING GRILL (stainless steel)

Foldable stainless steel grill has a unique patented shape. The bottom is made of a solid stainless steel sheet, it has two sloping faces and welded sidewalls. Folding shelves on the sides have two reinforcement ribs, which hold the grill shape at high temperatures and fight any deformation. The grill is very easy to fold and unfold, you just need to pull the legs from the bottom to the sides, lift the folding sides and install the side shelves. When folded, the grill is very compact 50 cm by 30 cm and is only 8 cm high. The grill is provided with a comfortable and durable bag, which allows you to transport and carry the grill without any inconvenience. This durable and reliable grill made of stainless steel does not rust and is protected from deformation.
