

# Made in Russia

International Export Forum  
**October 19-20, 2023**

[forum.exportcenter.ru](http://forum.exportcenter.ru)

Made in Russia is a key platform intended to:

- Encourage a dialogue between Russian exporters and importers and representatives of friendly countries in order to boost business relationships
- Focus on medium/large-size businesses lacking well-established or fully functioning foreign trade divisions (like in the case of large corporations), but striving to increase their footprint by exporting their goods or services
- Reveal entire array of educational opportunities for advanced training programs offered by Russian Export Center and its partners
- Ensure reliable support for Russian entrepreneurs, in particular for regional businesses
- Unveil a pool of both financial and non-financial export/import support tools, digital platforms, product/service promotion solutions, a network of showrooms, sales representatives, Russian Export Center partners, etc.
- Make sure that the Russian exporters are aware of the broadest range of opportunities they can benefit to build partnerships in MENA, Latin America, Asia, Africa, and the EAEU

In 2023, the Forum will be held on **October 19-20** in “**Manege**”, Moscow.

The Forum will also host an **exhibition of Russian technologies** for visitors and partners, representatives of the expert and business communities, to demonstrate export potential of Made-in-Russia products.

Key points of the Forum’s business agenda:

- financial tools and solutions
- non-financial export support
- international dialogue
- transport & logistics corridors
- marketing
- a go-to-market strategy workshop

Participation is **free of charge**.
